# RITEZYME™

All natural digestive enzymes

A working horse needs to get the most out of his diet. The stress of being out in the field creates the need to maximize what your horse eats. Commercial processed feed and cultivated grasses may not provide the essential components of a proper diet, for example, the proper amount and type of enzymes needed for digestion. Enzymes play an essential role in the digestion of food. By breaking down food so that the nutrients can be absorbed, your horse gets the most from what he eats.

Without enzymes, indigestion occurs, and undigested food moves into the colon where bacteria create gas, bloating and irregularities in their bowel movements. The expense and effort to provide a better diet for your hard working animal goes to waste, literally.

RITEZYME™ is specially formulated to provide the right combination of enzymes to aid digestion for the working horse, race horse or show horse. Our Active Formula contains a more powerful blend of enzymes to provide the right ingredients in the right proportion to support your animal's active lifestyle. No sugars, all natural ingredients. **The result? A healthier, happier working horse!**

**RITEZYME™, the right stuff for a healthier, happier animal!**

## What's in RITEZYME™ Active Formula?

RITEZYME™ Equine Active Formula contains a proprietary enzyme blend of Lipase, Xylanase, Beta Glucanase, Alpha Galct., Alpha Amylase and Glucoamyase, Protease, Pectinase, Hemicellulase and Cellulase.

### Minimum Guaranteed Analysis (per gram)

Enzyme	Activity / Type	Amount (mg)
Pancreatin 4X		125
Amylase	12,500 USP	
Protease	12,500 USP	
Lipase	1,000 USP	
Cellulase	500 CU	100
Hemicellulase	1,500 HCU	150
Xylanase	1,150 XU	8
Beta Glucanase	250 BGU	125
Alpha Galact	25 GalU	25
Alpha Amylase	3,670 DU	367
Glucoamyase	10 AGU	50
Pectinase	10 AJDU DU	50

*"I recommend RITEZYME™ in my practice for patients of all ages and in all stages of health."*
