RITEZYME™

All natural digestive enzymes

Horses were born to graze on shrubs, grasses and weeds in the field. Today's commercialization of food has changed what your horse consumes. Processed feed and cultivated grasses have lost

essential components of a proper diet, for example, the proper amount and type of enzymes needed for digestion. Enzymes play an essential role in the digestion of food. By breaking down food so that the nutrients can be absorbed, your horse gets the most from what he eats.

Without enzymes, indigestion occurs, and undigested food moves into the colon where bacteria create gas, bloating and irregularities in their bowel movements.

RITEZYME™ is specially formulated to provide the right combination of enzymes to replace what is missing in the diet of most animals. Our formula contains the right ingredients in the right proportion to support your animal's digestive processes. No sugars, all natural ingredients. **The result? A healthier, happier horse!**

RITEZYME™, the right stuff for a healthier, happier animal!

What's in RITEZYME™ ?

RITEZYME™ Equine Digestive Support contains a proprietary enzyme blend of Amylase, Lipase, Bromelain, Cellulase, Hemicellulase and Alfalfa powder. The enzymes break down the proteins, fats, carbohydrates and cellulose in your animal's food.

Minimum Guaranteed Analysis (per gram)

Enzyme	Activity / Type	Amount (mg)
Amylase	2,500 SKB	250
Lipase	300 FIP	80
Bromelain	12 GDU	150
Cellulase	75 CU	250
Hemicellulase	100 HCU	250
Alfalfa powder		20

"I recommend RITEZYME™ in my practice for patients of all ages and in all stages of health."

Dr. John J. Hanover, D.V.M.
